

# LORD VOLDEMORT

## VILLAIN GUIDE

# Lord Voldemort's Objective

## Conquer Death.

The only thing standing between the Dark Lord and eternal, unlimited power is the greatest nemesis of all mankind: Death. In order to stake his claim over the Wizarding World, you must feed Lord Voldemort's Ambition by searching the dark arts for artifacts and methods to become immortal, then cast off your own humanity, one sliver at a time.

## The Path to Immortality

Lord Voldemort's search for immortality leads down the risky Paths of the dark arts. Each card in Lord Voldemort's deck features a Path symbol in the lower corner.

Each time you play an Effect or Item, discard an Ally from your Realm, or defeat one of the few Heroes with one of these symbols, mark the matching symbol on your Path Tile.

Once you have marked three of these Symbols, immediately perform the Ability listed for whichever symbol has the most marks, then take 1 Power from the Supply and put it on your Board to keep track of your Ambition. After that, remove all three markers and prepare to work toward a new Path.

**Note:** If each Path only has one mark, do not perform any Abilities; only gain the Ambition.

# Using Ambition

Once you have completed a few Paths, you will have a good stockpile of Ambition. Certain cards include Ambition as part of their Cost, but your primary use for it is to convert it into Immortality.

When you perform a Discard Cards action, you may convert one of your Ambition into Immortality instead of discarding any cards. Place the Power token on the Paths tile, on the Discard Cards icon, to keep track of your Immortality.

Once you have completed the process of turning Ambition into Immortality seven times, you win the game.

# Ally Path Symbols

Since you do not mark Path symbols on your Allies until they are discarded from your Realm, you will either need to perform Vanquish actions or use one of your Effects to take advantage of their unique input.

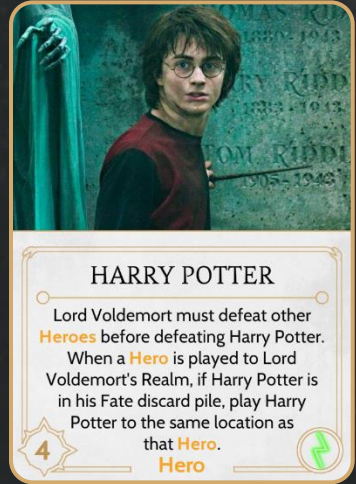

Avada Kedavra is a versatile card in your arsenal. Not only can you use it to clear out troublesome Heroes, but you can also use it to discard Allies and mark their Path symbols quickly.

If you would rather not curse your own Allies, or if you cannot afford to, you have an alternative in The Dark Lord Shall Rise Again to mark your Allies' Path symbols.

# The Boy Who Lived

Harry Potter is unique even amongst the Heroes with Path symbols in that his unique symbol is wild! When you defeat him, you choose which Path Symbol to mark, so take advantage of this flexibility.

However, there is a catch—any time a Hero is played to your Realm, Harry will also make a return from the discard pile, making him a persistent threat who can only be defeated if he is the only Hero in your Realm.

The other members of the Golden Trio work alongside Harry and each other to slow your path to Immortality.
